

Counting In the Cup

You need:

- A paper cup
- number cards (1-7)
- die
- counters

1. First player turns over the top number card and places the indicated number of counters *in* the cup.
2. The card is placed next to the cup as a reminder of how many are there.
3. The second player rolls the die and places that many counters *next* to the cup.
4. Together decide how many counters in all.
5. Put the counters back and start over.
