

Dot Card Activities

Cut the Dot Cards out into single cards, to use like flashcards.

1. Show your child a card and ask them to tell you how many dots are on the card without touching it to count. Continue the activity for a few turns, or up to a certain number like 5.
2. Turn the dot cards face down on the table and ask your child to choose one and turn it over. Have them count as many objects as there are dots on the card.(You will need to have a collection of objects to count- plastic lids, crayons, beans, etc.)
