Book Title/Author: The Good Doctor by Wensley Clarkson

Library Name: Gooding Middle School Library

Essay:

The Good Doctor is a biography about Dr. Fred Shipman and a somewhat detailed account of his life. He was a doctor that due to drug use and eventually, pure insanity, killed many people. He was the most prolific killer in the world and from the start in the early 60's to the end in the early 90's killed 256 people before getting caught. He had an incredibly interesting life. The book is very informative and interesting to see the daily life of a mass murderer. His life was fairly normal which makes his own words "mercy Killings" seem ever stranger. It takes a look into his life and really shows you the real life of these kinds of people. It's an incredibly interesting book and I would recommend it to anybody older than 10.
