

Libraries are for making..... Submission Template

Project Information:

- Library Name: Marshall Public Library Library Contact: Kath Ann Hendricks
- A short description about the creation. What media, computer program, or design method was used:

As one of our activities during TTW we made LED Chuties. We made them 2 different days with the 2nd day being a day we launched them from a bottle rocket during our Ender's Game Party. This picture shows the launch from our 2nd floor atrium of one of the more innovative chuties that had 3 chutes. The teens created these from clear plastic grocery bags and the attached an LED light with a coin cell battery to the strings. They are much more colorful in the dark, but we did not have the opportunity to launch them on either day in the dark.

This is the LED Chutie launch and landing from our 2nd floor atrium in the library:
