

# IDAHO LIBRARY MAKERSPACES

**M**ake It at the Library is a project developed by the Idaho Commission for Libraries to support the creation of Makerspaces in five public libraries. The Commission is providing the necessary materials, trainings, and support to implement creative STEAM-based programming for tweens and teens. The project encourages the use of new technologies and tools and will eventually expand to include opportunities for all ages.

## KEY LESSONS LEARNED

Plan, plan, plan...and then prepare to be FLEXIBLE!

Makerspaces can be created in any space.

Develop an inventory management plan that works for you!

Kids love a challenge and learn best when having fun!

Stealth programming engages reluctant teens & introduces others to Makerspace possibilities.

Share your projects and program outcomes to:

- Highlight your teens' work and creativity.
- Demonstrate the value of "making."
- Increase community participation.
