Large Print Collection Discontinued

The State Library Board at its February Board meeting directed staff to discontinue circulating the Large Print Collection effective July 1, 2006. The decision is based on the large number of public libraries with large print collections and declining numbers of large print users. The last books will be shipped to users June 1 so that they can be returned in early July.

Current users will be notified of contact information for their local public libraries before July 1. Public libraries will also be informed of the change in policy and the number of potential large print users in their service areas. Many libraries have extension services for persons unable to visit the library in person. All libraries can ship large print materials free matter for the blind, and users can return them to libraries the same way. The large print collection will be distributed to Idaho public libraries based on their ability to make them available to users.

Please contact the Talking Book Service with questions about this change in service.

Voting options increased for Primary Election

Idaho voters will have more accessible voting options for the May 23 Primary Election. In the past, many voters with special needs have voted with the assistance of a person of the voter’s choice or with a mail-in absentee ballot. Other accessible voting options have also been available in special cases.

Voters will have another option this year. In compliance with the Help America Vote Act, Federal grant funding has purchased a ballot marking device for each polling place in the state. The ballot marking device will assist voters who have difficulty reading or marking a ballot to vote privately and independently.

Visually impaired voters can use headphones to listen to an audio ballot and make their selections using a Braille keypad. The ballot marking device has a touch screen with a zoom feature to enlarge the ballot print and a contrast feature to make the ballot easier to read for some voters.

The ballot marking device only marks a ballot. No votes are stored in the machine. Voters can review and change their selections before the device marks a paper ballot. Voters using the ballot marking device, just like any other voter, may request a new ballot from a poll worker if they make a mistake.

Voters can contact their county clerk for information on all accessible voting options, to request information on obtaining an absentee ballot, and to learn where to vote. Information on voting is also available at the Office of the Secretary of State (334-2852) and online at www.idahovotes.gov/vinfo.htm

Volunteer Spotlight: Meet Gayle Schabot

by Sheila Winther
Volunteer Services Coordinator

Gayle has been a volunteer at Idaho State Library Talking Book Service since September 2002. She comes in two to three days per week and has donated over 1,500 volunteer hours. One of her duties is creating all the labels, both print and Braille, which are used in repair and duplication of the Talking Books. She also keeps the Talking Book repair area organized by making lists of books to be repaired, pulling and filing master tapes (non-circulating copies used for tape duplication), and keeping Fred Riddle in line (see volunteer spotlight in the last TBS Newsletter). She never hesitates when asked to help out on special projects.

Gayle started volunteering with us shortly after moving to the Boise area from Buhl, where she and her late husband owned and operated an accounting business. She has many hobbies, but favorites include her four grandchildren -- two boys and two girls -- and collecting antique Blue Ridge China.

Gayle’s dependable service for the library ensures a quick turnaround time for those popular books in repair. With her help in 2005, volunteers repaired over 10,000 Talking Books.

Thanks Gayle for being such a dedicated volunteer and a really fun person to work with. The library is fortunate to have you and all the volunteers who help us deliver great service to our Talking Book patrons throughout Idaho.
