

Ornament Lacing Activity

Make an ornament with your little one! Start by pulling the piece of yarn through the top hole of the foam shape. Show your child how to weave the yarn in and out of the holes. (Use the taped end of the yarn to make it easier for little fingers!) Let them be creative with their weave: along the edges, side to side or random -- just make sure they eventually finish back at the top. Tie the two ends of yarn together to form a loop at the top. Cut off any extra yarn and you're all done!
